Let Your Customers Find You

Excellent Standards

Hawaii Web Pros will respect and treat your business like family. We often go above and beyond your expectations.

Things you should know!

8 out of every 11 users on the web use search engines to find information or a product to buy.

- 11% of Search engine clicks come from the second page of keyword results.
- Upwards of 85% of searchers ignore paid listings. This term has been coined banner blindness.

Traffic Is Key....

- Natural organic results have been shown to pay out more than 30% higher than Pay Per Click programs. "Where are your dollars going?"

What does this mean?

Simple.. **FIRST**-your target market is not looking past the first page of major search engines and cannot see your big flashing website. **SECOND**-paid listings and banners are not

working as well as they did in the past. **THIRD** - internet users are

primarily using search engines to find product and info. Good website ranking can boost your business if you are a small biz or a large biz. [Hawaii Web Pros](#) can and will work for you so that you can focus more on what is really important and that is maintaining your business.
